

#GetTheVaxFacts

#GetTheVaxFacts is helping New Yorkers take steps to ensure all New Yorkers are getting accurate information about their health. You can help your community by slowing the spread of dangerous misinformation.

The Top 7 #GetTheVaxFacts

- 1.** The COVID-19 vaccine does not cause infertility for women or men.
- 2.** The vaccine is your greatest protection against the virus—for pregnant people and their babies—and it is safe to breastfeed your baby after getting the COVID-19 vaccine.
- 3.** Decades of research went into the vaccines. No steps were skipped during the clinical trials.
- 4.** Your DNA is not changed when getting the vaccine. The vaccine never enters the nucleus of the cell, where DNA is located. What the vaccine does do is tell your body to make an immune response to the virus.
- 5.** The vaccines do not contain microchips.
- 6.** The vaccines cannot cause a person to become magnetic.
- 7.** Vaccine side effects are not dangerous and are just a sign of your immune system doing its job.

How can you help others #GetTheVaxFacts?
